

ANNEXURE A

Mandatory Correction of Member Contribution Increases & Remediation of Systemic Waste

- FINAL ANNEXURE TO 5% MEMBER CONTRIBUTION

- FINAL UNCONDITIONAL ULTIMATUM • Deadline: 13:24, 16 April 2026
- Mandatory Correction of Member Contribution Increases & Remediation of Systemic Waste

•

1. Dear Members of the Board

- Be advised that as part of the settlement requirements to prevent the commencement of the "Statutory Siege" at 13:25 16 April 2026, I am adding the following non-negotiable directive regarding the scheme's financial sustainability:

1.1 Downgrade of Contribution Increase:

- The 9.5% member contribution increase for 2026 must be immediately downgraded to a maximum of 5%.

1.2 Justification:

- My forensic findings, supported by the Mahlangu RCA, prove that the 4.5%–5.5% gap above the CMS recommendation is not a medical necessity. It is a "Governance Tax" levied to backfill the R2 billion annual shortfall and the R180 million daily leakage caused by the Gexus-DMS integration gap.

1.3 Remediation of Waste vs. Taxation:

- The Board is hereby directed to fund the remaining 4.5% shortfall by fixing the documented IT wastage and recovering lost claims rather than taxing the members.

1.4 Consequence of Refusal:

- Failure to agree to this downgrade by 13:24 will result in the immediate transfer of the "Forensic Payload" to the Unions (PSA, NEHAWU, DENOSA). I will advise them that the 9.5% hike is based on Material Non-Disclosure in the April 8th Integrated Report, providing them with the legal standing for a High Court Interdict to freeze all premium increases.

I am finished with silence. You have until 13:24.
