Dear Sirs/Madams,

I am submitting this urgent supplementary evidence regarding **AfroCentric Health (Medscheme Holdings)**. This filing documents a systemic failure of corporate oversight and establishes that the Respondent's recent litigation conduct constitutes an attempt to suppress **Material Operational and Statutory Risks** through economic duress.

1. Institutional Validation of Allegations

The seriousness of this matter has been formally recognized and referred by the following statutory bodies:

- **Council for Medical Schemes (CMS):** Following a review of "Administrator Misconduct and Ethical Failure," the CMS has formally referred this matter to the **HPCSA Legal Med** department for investigation into "Undesirable Business Practices."
- **SA Human Rights Commission (SAHRC):** The Commission has formally acknowledged the "**seriousness of the allegations**" and the severe "personal impact" of the victimization, redirecting the financial fraud aspects to the **Department of Employment and Labour (DEL)**.
- **B-BBEE Commission:** A formal inquiry is currently active regarding "**Window Dressing**" and the fraudulent utilization of my NQF 8 credentials for Management Control points.

2. Documented Statutory Fraud (UIF & BCEA)

Official uFiling records extracted on **10 February 2026** (attached) confirm that the Respondent has failed to declare statutory employment data for June 2025.

- This fraud persists despite a formal warning issued on **15 January 2026** and a subsequent **written misrepresentation** by the Respondent on **19 January 2026** claiming that all records were corrected.
- The persistence of this criminal statutory breach indicates a complete failure of the Board's **Social and Ethics Committee** to ensure lawful administrative conduct.

3. Bad Faith Litigation & Market Integrity Risk

During formal conciliation on **9 January 2026**, the Respondent attempted to settle this multi-regulator crisis with an offer of **one-month's salary (approx. R43,000)**.

- I submit that this "lowball" offer was a calculated attempt to secure a non-disclosure agreement (NDA) to bury evidence of a **Clinical System Integration Gap (GEMS Ref: 000655789)** and the aforementioned statutory frauds.
- In a listed entity, using "Bad Faith" litigation tactics to conceal operational risks and administrative fraud is a direct violation of the **King IV Report on Corporate Governance** and **JSE Listing Requirements**.

4. Material Risk Disclosure

The Respondent is currently facing concurrent investigations by the **DEL, SANC, HPCSA, B-BBEE Commission, CMS, and SAHRC**. I request that the JSE and FSCA determine whether these legal contingencies have been adequately disclosed to shareholders and whether the management team remains "**Fit and Proper**" to oversee a regulated financial institution.

Respectfully submitted,

Sr. Wilbur William Matthee

RN, NQF 8 Specialist Health Manager
