To the Complaints Adjudication Unit
Council for Medical Schemes

Thank you for your response of 4 February 2026 referring my complaint to the HPCSA.

I write to notify the CMS of two developments and to raise one outstanding question.

FIRST – REFERRAL CHAIN NOW COMPLETE:
The HPCSA responded on 11 February 2026 confirming that jurisdiction over registered nurses lies with SANC. I have filed formal complaints with SANC (10 February 2026) and the South African Pharmacy Council against Lisa Mari, Responsible Pharmacist (16 February 2026). A Ministerial Escalation has been filed with the Minister of Health regarding SANC's failure to acknowledge the complaint within six days.

SECOND – CLARIFICATION OF MY EARLIER DOCUMENTS:
In correspondence sent today to SANC and SAPC, I incorrectly characterised the CMS response as a formal finding of 'Administrative Misconduct and Ethical Failure.' I have corrected this with both bodies. The accurate characterisation is that the CMS received my complaint, reviewed the materials, and referred the matter to the HPCSA as falling within health professional jurisdiction. I apologise for the overstatement.

THIRD – OUTSTANDING QUESTION ON PATIENT SAFETY:
I respectfully ask the CMS to confirm whether the Gexus/DMS integration gap (GEMS Ref: 000655789) – which was generating false non-adherence reports to chronic GEMS patients – has been corrected following the resolution formulated by Medscheme's Responsible Pharmacist.

If the gap has not been corrected, chronic GEMS patients may still be receiving false clinical information about their own medication adherence. This is a patient safety matter that falls squarely within CMS jurisdiction regardless of the employment dispute. I respectfully request that the CMS conduct a technical compliance review of the Gexus/DMS integration status as an independent patient safety matter.

Yours faithfully,

Sr. Wilbur William Matthee
SANC No: 1583 1886
