Dear Commissioner and Legal team,

I am following up on my correspondence dated 20 March 2026 regarding the unremediated Gexus-DMS integration failure at Medscheme.

The attached formal notice serves to re-frame this disclosure. While my previous engagement was partially referred to professional bodies, this submission provides conclusive evidence—including a Root Cause Analysis—that the issue is a systemic technical failure in Administrator infrastructure. This constitutes maladministration and a breach of Accreditation Standards under the Medical Schemes Act.

As this "Priority 1" risk continues to affect GEMS beneficiaries, I request a substantive re-engagement and investigation into the Administrator’s system integrity.

I look forward to acknowledgement of receipt and a substantive report or feedback within 15 days.

Sincerely,

Wilbur William Matthee
