Dear Mr Myburg

I am Wilbur William Matthee, a senior nursing professional and former Case m n I jhhhhhhh MN !nwManager for Active Disease Risk Management at AfroCentric Health (Medscheme). I am breaking my silence because this healthcare giant has used its institutional power to execute a campaign of "professional capital punishment" against me for blowing the whistle on governance risks.

In early July, management lied to me in writing, claiming company policy forbade the "staggering" of a debt. They used this lie to justify an unlawful deduction of over 40% of my salary while I was admitted to a psychiatric hospital. In a display of extreme bad faith, on the very day of the deduction, management sent a second email proving that staggering is allowed—effectively mocking my financial destruction.

Immediately following my formal report of gender identity discrimination, senior management referred to the "Wilma" incident (a feminine version of my name, Wilbur). Senior management informed the union & HR and white-washed this as a "typo," calculated tool of harassment used to erase my identity.

When I escalated these abuses to the Executive leaders and CEO, after I was met with 30 days of "Institutional Silence." From the union Nehawu and HR.

The "Ripple Effect" Threat: I possess a recording where my manager warns me to "think of the ripple effect" of my actions as a whistleblower.

De-escalation: Executive management sent my evidence back to the very department I was reporting.

Character Assassination: In legal filings, they have characterized me as "sloppy" and "untruthful" to justify their retaliation.

AfroCentric Health did not just dismiss me; they attempted to erase me. I have lost my home, my ability to buy medication, and my professional nursing registration (SANC).

I am done with this company. I have rejected their "low-blow" offer of one month's salary. I am now proceeding with a R10 million claim in the Labour Court and am filing formal complaints morning Monday 12th January 2026 with:

The JSE & FSCA (King IV Governance breaches)

B-BBEE Commission (Governance fronting)

CMS (Suppression of medical evidence)

SAHRC (Constitutional identity violations)

National Prosecuting Authority (Criminal BCEA contraventions)

I have the recordings, the conflicting emails, and the "Wilma" screenshot ready for your immediate review. I am available for an interview at any time. I also have a master bundle of 328 pages consisting of all allegations against this Healthcare giant Afrocentric health.

Sincerely,

Wilbur William Matthee

RN, BCur (HMN), PG Dip HSM (NQF 8)
