Subject : RE: FORMAL SERVICE: Strengthened Consolidated Forensic Oversight Report [IMAN-CPT_MATTERS.FID2264505]

Date : 22 Jun 2026 22:22

1. ACKNOWLEDGMENT & TIMING

I acknowledge receipt of your correspondence dated 22 June 2026. Just saw it as i was busy with the transmission just received.

I note the timing: Your letter arrives while I am finalizing my constitutional submission to Parliamentary Oversight Committees. This is a transparent attempt at pre-emptive intimidation.

I have not yet submitted the documents to Parliament. Your letter is an attempt to prevent me from exercising my constitutional rights. This is noted and will form part of the record.

2. THE COURT ORDER – IT DOES NOT RESTRICT PARLIAMENTARY SUBMISSIONS

You attach the High Court orders dated 16 April 2026 and 28 May 2026.

The order restrains communications to JSE, CIPC, and IRBA. It does NOT restrain submissions to Parliament.

- Section 55(2) of the Constitution – Parliament has the power to exercise oversight over the executive and the judiciary. This is not subject to court interdicts.
 - Section 58 of the Constitution – Parliamentary privilege protects communications to Parliament.
 - The order does not, and cannot, restrain a citizen's right to petition Parliament.
- I am not in contempt. I have not violated the order. I am exercising a constitutional right.

3. YOUR LETTER IS EVIDENCE OF THE ATTRITION STRATEGY

Your letter – arriving precisely as I finalise my parliamentary submission – is the "Without Prejudice" Bait-and-Switch documented in Section 8 of the Consolidated Forensic Oversight Report:

- You initiated settlement discussions.
- You demanded my entire case file within 24 hours – no reciprocal disclosure.
- You proposed an unrecorded meeting that refused to commit to any binding resolution.
- You failed to provide an agenda by the agreed deadline.
- Now you threaten contempt proceedings to stop me from exercising my constitutional right to petition Parliament.

This is the attrition strategy in real time. It is now part of the parliamentary record.

4. FINAL NOTICE

I am finalising my submission to:

1. Parliamentary Oversight Committees – under Section 55(2) of the Constitution.
2. The Information Regulator – for POPIA breaches.
3. The Judicial Service Commission – for administrative malfeasance.
4. The South African Human Rights Commission – for constitutional violations.

Your letter is now evidence of attempted suppression of constitutional oversight.

GOVERN YOURSELVES ACCORDINGLY.

Subject: FORMAL SERVICE: Strengthened Consolidated Forensic Oversight Report
Importance: High

Board of Directors,

Please accept this email as formal service of the Consolidated Forensic Oversight Report, which is now entering the final stages of submission to Parliamentary Oversight Committees.

This notice is served upon you in your personal capacity. While my previous communications served to place the institution on notice of systemic risks, this correspondence addresses your individual failure to discharge your fiduciary duties. As Directors, you are now in possession of the full forensic record, which outlines the verified material fraud, B-BBEE fronting, and the materially false disclosures approved by this Board for the 2025 Integrated Annual Report.

The complete, immutable digital dossier is accessible here: <https://ethichawks-forensic-governance-portfo.netlify.app/>

The complete, immutable pdf dossier is accessible here: https://drive.google.com/file/d/1D-7NkwX2My9UNmaSVatcd_A9O92HfBGv/view?usp=drivesdk

This report is not a new warning; it is a stark, immutable reminder of the consequences you were cautioned about months ago. On 9 December 2025, the Board received the P1 Material Risk Report, which detailed the financial and regulatory exposure you were incurring. Over the subsequent months, nine formal escalations were issued; you chose silence in every instance.

Your defensive strategy has followed a predictable pattern. There is a specific archetype of chess player who, when they realize they are in check, tips the board over. They scatter the pieces and walk away, confident that the absence of a visible board equates to the absence of a recorded position. Every time you have attempted to "tip the board"—be it by suppressing GRC escalations, instructing whistleblowers to cease communication, or obstructing legal portals—I have meticulously reconstructed the record.

Mr. Whyte is now the subject of a Parliamentary case study on litigation attrition deployed against destitute, self-represented litigants. His conduct the 11-day delay in "taking instructions" after initiating settlement, the asymmetrical evidentiary demand requiring my entire case file within 24 hours while offering no reciprocal disclosure, the post-deadline proposal for an unrecorded meeting that explicitly refused to commit to any binding resolution, and the exploitation of my homelessness to run down the clock is documented in full at Section 8 of the report.

I trust Mr. Whyte will find this section particularly illuminating. His engagement in a calculated attrition strategy is a profound dereliction of the standards he once swore to uphold on the bench. This conduct is formally recorded, and appropriate referrals to the Legal Practice Council are in progress. His tactics will now be studied by Parliament as a textbook example of how the legal profession's self-regulatory mechanisms can be weaponised against vulnerable litigants.

Regarding the Complexity and Timing of This Submission

I wish to address directly any suggestion that this submission should be stalled or dismissed because the GitHub Pages site remains under construction or because the final audit report is pending.

The full electronic file is complete. The hard copy PDF document of 82 pages is complete. The site you see building in real time is not the compilation of new evidence it is the public-facing interface for evidence already compiled, already verified, and already served. What you are witnessing is the final audit stage: the integration of independently-

ventilated specialist bundles into a single, navigable parliamentary interface. The substance of the case against you does not depend on a website's build status. It depends on primary-source documents — your own Root Cause Analysis, your own payslips, your own CCMA affidavits, your own Integrated Report — and those documents are already in Parliament's possession.

The building process you observe is transparency in action. It is the opposite of concealment. It is the reason every document in this bundle carries a SHA-256 cryptographic hash.

Verified Integrity Log

Every document contained within this bundle is subject to a SHA-256 hash-audit, ensuring the non-repudiation and integrity of the evidence provided for official parliamentary review. This means:

- Each file — whether an email export, a court filing, a payslip, or a corporate report — produces a unique 64-character hexadecimal fingerprint.
- A single altered character, space, or metadata timestamp in any document would produce a completely different hash, making tampering instantly and mathematically detectable.
- The hash_manifest.sha256 file locks the evidential state at the point of submission. Any party — including this Board, its legal representatives, or any regulatory body — can independently verify the integrity of every document with mathematical certainty.
- There will be no document substitution. There will be no retrospective alteration. The record is immutable.

The Section 162 application seeks to hold you individually liable for systemic and humanitarian harm, pursuing a 7-year ban on professional directorships for each named Director .

This document serves as final notice regarding the matters detailed herein. The evidence is complete. The audit is in its final stage. The Parliamentary submission is proceeding before COB pending final audit. The SHA-256 integrity log is published. The record is immutable. For the avoidance of any doubt see screenshots of the current status of the build.

Govern yourselves accordingly.
