Dear Chief Risk Officer Monwabisi Kula,

Thank you for your email dated [18 Dec 2025].

I acknowledge your request. However, I must respectfully decline to cease communication with the Board's oversight committees regarding this matter.

My communications to the Social & Ethics Committee and the Risk Committee constitute formal escalations of a Priority 1 Material Risk Report, as defined in the attached dossier submitted on 9 December 2025. The issues raised involve serious allegations of discrimination, retaliation, unlawful conduct, and systemic governance failures, which fall directly within the fiduciary and statutory mandates of these committees.

The suggestion that follow-up communication indicates "impatience and unreasonableness" is noted. My follow-ups are a direct consequence of a documented 30+ day institutional silence on formal grievances, the de-escalation of a protected disclosure back to the source of the complaint, and the absence of any substantive acknowledgment or action plan from the executive leadership or the board committees themselves.

Given the severe and ongoing personal, financial, and psychological harm documented, along with the material legal, reputational, and operational risks to the organization, continued oversight and a timely, independent response from the highest level of governance are not only reasonable but required.

I trust the relevant committees will exercise their independent judgment in reviewing the evidence and determining the appropriate course of action, irrespective of the volume of correspondence.

I will continue to copy the relevant committee chairs and the Company Secretary on material updates pertaining to this risk report, as is my right and responsibility as the whistleblower.

Sincerely,

Wilbur Matthee
